#### ABOUT THE STATE

The Rutland Driving club is to spend  
about \$300 improving its track.

Meritt Robbins of Hancock caught a  
bear weighing over 400 pounds last  
week. This was the 103th bear he has  
caught.

The rifle practice for the Vermont Na-  
tional Guard will be held in Northfield  
next week. The regiment does not go  
out of the state this year.

A Poland working in the yards of  
the Vermont Marble company, Monday,  
was struck by a flying chain which prac-  
tically tore off his scalp. It is believed  
he will recover.

#### MURDER IN COURT ROOM.

Tragic Climax to a Legal Struggle For  
Possession of a Child.

Little Rock, Ark., July 28.—Suit for  
possession of a child reached a tragic  
climax during a conference of the prin-  
ciples in the suit in the circuit court  
room here late yesterday when W. Y.

Ellis, nephew of John F. Rutherford,  
millionaire lumberman of Pine Bluff,  
Ark., shot and killed Nathaniel Parker  
Willis of Indianapolis, Ind., a promi-  
nent business man and politician, father  
of the child and former husband of Mrs.  
Ellis. The suit at law was terminated  
yesterday Judge Pulk instructing that  
the child be surrendered by Mr. Ellis to  
the custody of Willis. Yesterday's  
conference was to arrange the details.

Those participating were Willis and  
Ellis, who represented his wife divorced  
from Willis some years ago. United  
States Senator Jeff Davis, who appeared  
as attorney for Ellis; and Judge Pulk.  
Arrangements were being concluded  
when Ellis fired over the shoulder of  
Davis at Willis. A court attaché struck  
his arm as he fired, however, and the  
bullet went wild. Willis ran from the  
room with Ellis in close pursuit, the  
latter firing again when he reached the  
doorway, inflicting a wound from the  
effects of which Willis died within ten  
minutes. Ellis surrendered and was im-  
prisoned. Later, however, he was taken  
from the city by officers in an automo-  
bile for an unknown destination, for  
safe keeping.

#### People Object to Eliminating Crossing.

The hearing held in Newport Friday  
and Saturday by the public service  
commission in relation to a petition of  
the Boston & Maine railroad, asking for  
an elimination of the crossing on the  
Indian point road and the crossing near  
netherly, was adjourned to August 10.

The plan given by the railroad is to  
improve the present underpass just  
south of the crossing on the Indian  
point road and build a new highway  
extending up by David Pray's residence  
and west of the Memorial Drive  
park, connecting with the Indian point  
road at a point near the Pine Grove  
cemetery entrance. This plan, if carried  
out, will make it necessary for people  
desiring to go from the neighborhood  
of M. C. Redell's house to the west side  
of the track to go over two miles out  
of the way.

Considerable objection was made at  
the time of the filing of the petition  
and since then opposition has grown  
steadily. The town of Derby is strongly  
opposed to it, not only on account of  
the inconvenience to its residents, but  
also on account of the large expense,  
the town's share being 10 per cent.

#### BOY SUES FOR DAMAGES.

He Claims \$5,000 Because of Negligence  
of Mill Keeper.

Rutland, July 29.—George E. Mar-  
shall, of Poultney, age 13 years, has  
brought suit in county court through  
George W. Marshall, "next friend,"  
against E. M. Rixby of Poultney, a  
grain merchant, asking \$5,000 damages  
on the ground that he was injured by  
falling into a hole in the floor of the  
mill on January 27, last when he went  
there to purchase some grain. Thomas  
W. Moloney of this city is counsel for  
the plaintiff.

#### COKE IN COLORADO AND UTAH.

Geological Survey's Report on 1908 Pro-  
duction.

In the geological survey's annual re-  
port on mineral resources of the United  
States, the statistics of the manufacture  
of coke in Colorado and Utah are com-  
bined in order not to divulge individual  
operations, there being but two estab-  
lishments in Utah, both of which are  
owned by one company. The production  
of the two states in 1908 amounted to  
982,291 short tons, valued at \$3,238,868,  
against 1,421,379 short tons, valued at  
\$4,747,436, in 1907. The decrease in 1908  
was 30.90 per cent. in quantity and 31.78  
per cent. in value. The average price  
per ton declined from \$3.34 to \$3.30.  
A notable increase is observed in the  
percentage yield of coke in coke during  
1908, as compared with preceding years.  
This is probably due to the larger pro-  
portion of coal which was washed before  
being charged into the ovens. In 1908  
nearly 75 per cent. of the coal used was  
washed, and in 1907 the percentage of  
coke making was washed, while in 1907  
only a little more than half of it was  
washed. There were 18 coking estab-  
lishments in the two states during 1908.  
The total number of ovens noted was  
4,705, an increase of 22 over 1907. Of  
the 18 establishments six, having a total  
of 1,169 ovens, were idle throughout the  
year.

For several years prior to 1908 practi-  
cally all of the coal used in the manufac-  
ture of coke in Colorado and Utah was  
washed, a large proportion of which was  
washed before being charged into the  
ovens. In 1906, however, 708,306 tons  
of run-of-mine coal was used, of which  
703,440 tons was washed. In 1907 the  
run-of-mine coal used decreased to 679,  
182 tons, of which 674,236 tons was  
washed, and in 1908 there was a further  
decrease to 357,840 tons, all of which was  
washed. The amount of slack used in  
1908 amounted to 1,208,504 tons, 900,771  
tons of which was washed before cok-

#### MINERAL RESOURCES OF ALASKA.

Report by Geological Survey, Just Pub-  
lished.

The mineral resources of Alaska penin-  
sula and the adjacent islands are sum-  
marized by W. W. Atwood in a paper  
appearing in the United States geologi-  
cal survey's bulletin 379, just issued.  
The paper, which includes also notes on  
the lignite fields bordering Cook inlet,  
is preliminary to a more complete report  
now in preparation.

The known mineral wealth of south-  
western Alaska consists of coal, petrole-  
um, gold and copper. Of these resources  
coal is the most important. It occurs  
in the Matanuska valley, on the shores  
of Cook inlet, near Chignik and Her-  
nden bays, and at various other places.  
The Matanuska field has been described  
in bulletin 289 of the survey; notes on  
the other localities are given in Mr.  
Atwood's paper. The coals of this region  
are lignitic and bituminous and range  
in heating value from 8,800 to 11,885  
British thermal units in the samples as  
collected, or from 6,528 to 11,804 British  
thermal units in air-dried samples. There  
have been no extensive developments and  
the coals have been used mostly for do-  
mestic purposes and to supply local  
steamboats and canneries.

This province is in about the same  
latitude as the British isles and except  
in the northern part does not suffer from  
severe climatic conditions. The mean  
winter temperature ranges from 12 de-  
grees to 30 degrees; the annual rain-  
fall from 16 to 100 inches. The mean  
annual precipitation is fairly good.  
Seward, Kodiak, and Seldovia may be  
reached by steamer from Seattle and  
local connection can be made to most  
other points.

Mr. Atwood's paper is illustrated by  
maps and sections and can be had free  
on application to the Director, United  
States Geological Survey, Washington,  
D. C.

#### MAN-A-LIN TABLETS.

The Manalins Tablets have been devised  
to take the place of the fluid Manalins.  
They are much more convenient to carry  
about the person than the fluid Manalins.  
The Manalins Tablets will be found  
effective and convenient for people suf-  
fering from indigestion, flatulency, sick  
headache and sour stomach.

#### WANTED

Ten first-class granite cut-

ters for building and monu-

mental work; one man to do

first-class carving, tracing and

finishing; one tool sharpener

and blacksmith. Only men

who can do first-class work

need apply. Steady employ-

ment the year round.

**The Munson Granite Co.,**

ZANESVILLE, OHIO.

#### GOT HIS HAIR BACK.

Was Perfectly Bald When He Started to  
Use Newbro's Herpicide.

Frederick Manuel, Maryland block,  
Butte, Montana, bought a bottle of New-  
bro's Herpicide, April 8, 1909, and began to  
use it for entire baldness. The hair fol-  
licles in his scalp were not dead and in  
20 days he had hair all over his head.  
On July 2 he writes, "and today my hair  
is as thick and luxuriant as any one  
could wish." Newbro's Herpicide works  
on an old principle and with a new dis-  
covery—destroy the cause and you re-  
move the effect. Herpicide destroys the  
germ that causes dandruff, falling hair,  
and finally baldness, so that with the  
cause gone the effect cannot remain.  
Stop falling hair at once and a new  
growth starts. Sold by leading  
druggists. Send 16c in stamps for sample  
to The N. B. Co., Detroit, Mich.

One Dollar Bottles Guaranteed.

**E. A. Drown, Special Agent.**

#### SAVING FIRE-KILLED TIMBER.

How Long Will Such Trees Remain  
Valuable For Use?

The forest service bureau of the de-  
partment of agriculture has been in-  
vestigating a large number of fire areas  
in Oregon and Washington in order to  
determine, if possible, the length of  
time which will elapse after a forest  
fire before the timber deteriorates to  
such a condition as to decrease its com-  
mercial value. The agencies which  
control timber to decay and encourage  
the fire-killed trees to be used as fuel  
or for other purposes. The fire-killed  
trees are to be used as fuel for the  
forest service, either from government  
timber land, or from private holdings  
where logging operations are under way.

In this connection the forest service  
determine the relative strength of green  
and fire-killed timber. The material  
which is to be tested is being sawed at  
the mill of the Eastern and Western  
lumber company of Portland, Ore., where  
it will be surfaced to exact sizes and  
then transported to Seattle, where tests  
will be made. The logs, which vary from  
three to four feet in diameter, were  
sawed into 32-foot lengths. These are  
being manufactured into 16-foot floor  
joists and bridge stringers. The results  
of these tests are being anticipated with  
great interest by forest service engineers  
and by the lumbermen of the northwest,  
because they are expected to disprove  
the opinion generally held regarding the  
strength of fire-killed timber.

#### Tortured on a Horse.

"For ten years I couldn't ride a horse  
without being in torture from piles,"  
writes L. S. Napier of Rugles, Ky.  
"When all doctors and other remedies  
failed, Buckle's Aches and Pains cured me."  
Infallible for piles, burns, scalds, cuts,  
sores, fever, chills, colds, salt rheum,  
cancer, 25c. Guaranteed by the Red  
Cross Pharmacy.

#### WILLIAMS' KIDNEY PILLS.

Have you neglected your kidneys? Have  
you overworked your nervous system and  
caused trouble with your kidneys and bladder?  
Have you pains in your back, legs, joints  
and head? Have you a sandy appearance of  
the face, especially under the eyes? Too frequent  
urine, loss of sleep, loss of appetite, loss of  
weight, loss of vitality, loss of energy, loss  
of power, loss of strength, loss of vigor,  
loss of manhood, loss of womanhood, loss  
of life, loss of health, loss of happiness,  
loss of peace, loss of comfort, loss of con-  
fidence, loss of respect, loss of honor, loss  
of credit, loss of influence, loss of power,  
loss of authority, loss
